Executive Summary & The Opportunity

South African law firms are operating with a fundamental productivity gap. Research that takes a junior associate four hours can be done in four minutes. Motions that take a day to draft take ten minutes. Statute of limitations errors — the single most common source of malpractice claims — become impossible. Yet no AI legal platform has been built specifically for South African legal practice.

LexAgent ZA fills that gap. Built on the same architecture as LexAgent — the AI legal workspace that covers 11 practice tools in a single platform — LexAgent ZA is tailored entirely to South African law: SAFLII case law, the Prescription Act, SA court hierarchy, LPC ethics rules, POPIA compliance, and South African document formats.

The SA Legal Tech Market

Over 25,000 practicing attorneys in South Africa. The majority use LexisNexis SA (R3,000–R8,000+/attorney/month) or Jutastat for research — and nothing else. No SA tool offers AI strategy analysis, judge intelligence, or multi-document reasoning. LexAgent ZA enters at a fraction of the cost with capabilities the market has never seen.

This proposal invites your firm to become LexAgent ZA's exclusive launch partner — the first SA law firm with access to this technology, with direct input into its development, at a launch price that reflects that foundational partnership.

What is LexAgent ZA?

LexAgent ZA is a complete AI-powered legal workspace. Every matter your firm handles gets its own workspace with 11 integrated tools — all talking to each other, all sharing the same case context, all accessible from a single interface on any device.

Tool	What It Does
ARES Research	AI legal research against SAFLII + SA legislation in plain English. Real citations only — no hallucinations.
Deep Research	Multi-step agentic research. Generates a verified legal memo automatically from 3-5 research steps.
Document Vault	Upload up to 5 documents. Ask questions across all of them simultaneously.
Strategy Board	One-click prosecution vs defence analysis: risk level, settlement probability, immediate action items.
Judge Intelligence	SA judge profiles: appointment history, political background, known preferences, courtroom strategy.
Prescription Calculator	Auto-calculates prescription deadlines under the Prescription Act 68 of 1969 for every charge type.
Case Timeline	Auto-generates chronological timeline from facts. Manual event addition.
Citation Shield	Verifies every citation against SAFLII. VERIFIED / UNCONFIRMED / NOT FOUND badges on every case.
Document Drafter	Generates 8+ SA-specific document types: Notice of Motion, Particulars of Claim, Heads of Argument, and
Evidence Notes	Evidence board: tag entries as Key Fact, Evidence, Witness, Deadline. Full-text search.
Conflict Check	LPC Rule 46 compliance. Search all matters for party overlaps instantly.

The South African Advantage

Feature	LexAgent ZA	LexisNexis SA	Jutastat	Generic AI

Billable Timer	Yes	No	No	No
Cross-device sync	Yes	Yes	Yes	No
Typical monthly cost / attorney	Retainer model	R3,000+	R2,500+	~R350

Partnership Terms & Pricing

LexAgent ZA is offered to your firm under an exclusive launch partnership. As our founding SA client, you receive a bespoke build tailored to your practice areas, direct input into feature prioritisation, and the launch partner rate — locked for the duration of the partnership.

	Detail	Amount (ZAR)
UPFRONT FEE (once-off)	Development of LexAgent ZA Phase 1: SAFLII integration, SA legal system config, Prescription Act calculator, SA document types, LPC compliance, POPIA disclosures, full QA. Payable on contract signature.	R25,000
MONTHLY RETAINER (ongoing)	Continued access and operation of LexAgent ZA. Includes: hosting of AI inference costs, platform maintenance, bug fixes, priority support response.	R4,000 / month
SUPPORT INCLUDED	Email + WhatsApp support channel. Response within 24 hours business days. Critical bug fix within 48 hours.	Included
NEW FEATURES (optional)	Feature requests beyond Phase 1 scope. Quoted per request — priority queue for retainer clients.	Quoted separately
CLAUDE MAX UPGRADE (planned)	Upgrade from Claude Sonnet to Claude Max for higher quality outputs and increased capacity. Funded after contract signature. No additional charge to client.	Included in retainer

ROI ILLUSTRATION

A senior associate billing at R2,500/hour who saves 6 hours per month on research and drafting generates R15,000/month in recaptured billable time — from a retainer of R4,000/month. The upfront fee pays back in under 2 months.

Project Timeline & Deliverables

LexAgent ZA Phase 1 will be delivered within one calendar month of contract signature and receipt of the upfront fee, followed by one week of structured testing and sign-off.

Week	Phase	Deliverables
Week 1	Foundation & Legal Engine	SAFLII Bridge integration SA citation format system SA court hierarchy configuration Prescription Act calculator (v1) SA-specific system prompt
Week 2	Documents & Compliance	SA document types: Notice of Motion, Particulars of Claim, Heads of Argument, Affidavit, Demand Letter, Contract LPC Rule 46 conflict check update POPIA disclosure screens ZAR billing timer
Week 3	Judge Intel & Citation Shield	SA judge profile seed database (top courts) Citation Shield updated for SAFLII verification SA legal research prompt tuning Strategy board SA case type calibration
Week 4	Integration & Hardening	Full system integration Cross-device storage validation Mobile UI testing Performance optimisation Full documentation update
Week 5	Testing & Sign-Off	Structured QA test suite (SA-specific scenarios) Client acceptance testing Bug fix sprint Formal sign-off Handover and onboarding session

What We Need From You

To build LexAgent ZA correctly for your firm, we require the following information and cooperation. None of this requires significant time — most can be provided in a single onboarding meeting.

#	What We Need	Why We Need It	When
1	Firm name, logo (high-res), brand colors	White-label branding of the interface	Week 1
2	Primary practice areas (e.g. commercial litigation, employment, property)	Tailored AI prompts and knowledge base to your specific work	Week 1
3	Jurisdiction focus (Western Cape, Gauteng, KZN, National)	Configuring legal hierarchy and relevant High Court divisions	Week 1
4	List of 5-10 judges your firm regularly appears before	Populating the Judge Intelligence database	Week 1
5	2-3 sample matters (anonymised)	Realistic QA — we test against your actual case types	Week 3
6	1 designated point of contact for testing & UAT	Weekly feedback requires an attorney to sign off on each feature	Week 5
7	Signed proposal and upfront fee (R25,000)	Deployment cannot commence without both	Before Week 1

Access & Data: LexAgent ZA runs in a browser — no IT installation required. Case data is stored in scoped cloud storage tied to your Claude.ai account. No data leaves Anthropic's sandbox. For POPIA compliance, we provide a Data Processing Agreement at contract signature.

Support, Maintenance & Future Roadmap

What the Monthly Retainer Covers

- Ongoing platform access** — LexAgent ZA remains live and operational for your firm.
- AI inference costs** — All Claude API usage costs are absorbed in the retainer — no usage bills.
- Bug fixes** — Any defects found post-launch are fixed at no additional charge, within 48 hours for critical issues.
- Maintenance updates** — As Anthropic releases new Claude models, we upgrade LexAgent ZA to benefit from improved capabilities.
- Priority support channel** — Dedicated WhatsApp and email channel. Business-day response within 24 hours.
- Monthly usage report** — Monthly summary of matters created, research queries, documents generated, and billable hours tracked.

Phase 2 Roadmap (Available as Feature Requests)

Feature	Description	Indicative Cost
Afrikaans Interface	Full UI and document generation in Afrikaans	Quoted on request
Multilingual Client Summaries	Auto-translate case summaries to any SA language	Quoted on request
Government Gazette Integration	Search SA legislation and regulations directly	Quoted on request
Extended Judge Database	Full SA judiciary coverage across all High Court divisions	Quoted on request
AgentFrame Migration	Migrate to self-hosted platform with PostgreSQL backend, SSO, multi-user firm support, PACER-style docket monitoring	Phase 3 pricing

As our exclusive launch partner, your firm receives first-mover access to all Phase 2 features at preferential rates before they are offered to the broader market.

Why FuseLabs — Why Now

FuseLabs AI Agency is an AI-first technology studio specialising in intelligent automation for legal, compliance, and professional services. We have built and deployed multi-agent AI systems, compliance automation tools, and ESG reporting platforms. LexAgent is our flagship product — a fully tested, production-grade AI legal workspace with a documented QA test suite.

Why the timing matters

The AI legal market is moving fast

Harvey raised \$80M at a multi-billion dollar valuation. CoCounsel is expanding globally. No SA-specific competitor exists yet. The firm that builds the SA legal AI standard in 2026 owns the market for a decade.

Exclusive means exclusive

This proposal is extended to one SA law firm. LexAgent ZA's SA launch configuration — your practice areas, your judges, your document types — will not be licensed to a competing firm while you are under retainer.

We build what you need

We are not selling you an off-the-shelf product. We are building your product. Feature requests from your attorneys go to the top of the queue. The system evolves with your firm's practice.

Terms & Next Steps

Key Terms Summary

Term	Detail
Upfront Fee	R25,000 ZAR — payable on contract signature. Development commences on receipt.
Monthly Retainer	R4,000 ZAR/month — invoiced on the first business day of each month.
Contract Term	12-month initial term. Renewed automatically on 30-day notice.
Exclusivity	LexAgent ZA SA configuration not licensed to direct competitors during retainer.
Intellectual Property	FuseLabs retains IP in the platform. Client retains IP in their case data.
Data Ownership	All case data belongs to the client firm. Deleted on written request within 7 days.
POPIA Compliance	Data Processing Agreement provided at contract signature.
Termination	Either party may terminate on 30-day written notice after initial 3-month commitment.
Support SLA	Critical bugs: 48-hour resolution. Standard support: 24-hour response (business days).
Claude Max Upgrade	Funded by FuseLabs post-signature. No additional charge to client.

To Proceed

- Step 1:** Review this proposal with your partners
- Step 2:** Contact FuseLabs to discuss any questions or amendments
- Step 3:** Sign the engagement letter (provided separately)
- Step 4:** Transfer the upfront fee of R25,000 — development begins within 48 hours
- Step 5:** Provide onboarding information (firm details, practice areas, judges — see Section 06)
- Step 6:** Receive your LexAgent ZA workspace within 4 weeks
